

ARYAN

Software Engineer | Backend & Full-Stack Developer

Delhi NCR, India | +91 9971882367 | 642singharyan@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer (B.Tech in Software Engineering, Delhi Technological University, 2026) with backend internship experience building RESTful APIs, authentication and authorization middleware, and SQL and NoSQL data layers using Node.js, Express.js, PostgreSQL, and MongoDB. Built and deployed three full-stack applications in JavaScript and Python (React.js, Node.js, FastAPI), with a solid foundation in data structures, algorithms, OOP, and DBMS. Experienced in testing and debugging APIs and working with a team in an Agile environment.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, TypeScript

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Backend: Node.js, Express.js, FastAPI, RESTful APIs, JWT, RBAC, bcrypt, Authentication Middleware

Databases: SQL (PostgreSQL, MySQL), NoSQL (MongoDB)

Frontend: React.js, Tailwind CSS, HTML5, CSS3

Tools / DevOps: Git, GitHub, Docker, Postman, OpenAPI, Vercel, Render

AI / APIs: Groq API, LLM API Integration, Prompt Engineering

EXPERIENCE

Backend Developer Intern | [LOGIXWEB](#)

Jun 2025 – Aug 2025

- Developed RESTful APIs using Node.js, Express.js, and MongoDB, designing backend architecture, data models, and secure server-side workflows.
- Implemented JWT authentication, authorization middleware, protected routes, and request validation to secure API access and user operations.
- Tested and debugged APIs using Postman, improved error handling, and resolved backend issues during development.
- Collaborated with the development team in an Agile environment to implement, test, and refine backend functionality.

PROJECTS

TeamFlow – Project Management SaaS

[Live](#) / [GitHub](#)

Node.js, Express.js, PostgreSQL, React.js, Docker, JWT, Groq API | Vercel, Render

- Built a full-stack project management application with RESTful APIs in Node.js and Express.js covering organizations, projects, tasks, comments, and team member management.
- Used PostgreSQL for relational data management and Docker for containerized database infrastructure.
- Secured workflows with JWT authentication, RBAC, and middleware-based authorization, including owner/member role management.
- Integrated the Groq API to generate project tasks from natural-language requirements and produce AI project status summaries; built a role-aware React.js frontend and documented and tested APIs with Postman.
- For Demo : email: aryan@example.com, Password: password123

Eventora – Full-Stack Event Booking Platform

[Live](#) / [GitHub](#)

React.js, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, RBAC | Vercel, Render, MongoDB Atlas

- Developed 13 RESTful APIs for user authentication, OTP verification, event management, bookings, and administrative operations using Node.js, Express.js, and MongoDB.
- Designed MongoDB schemas for Users, Events, Bookings, and OTP verification, with reusable middleware, JWT authentication, RBAC, and protected routes.
- Built separate User and Admin dashboards with React.js and Tailwind CSS; deployed on Vercel, Render, and MongoDB Atlas and validated REST APIs using Postman.

Aryan's-AI – AI-Powered Portfolio Assistant

[Live](#) / [GitHub](#)

Python, FastAPI, React.js, Groq LLM, Pydantic, PyPDF | Vercel, Render

- Built a full-stack assistant with React.js, FastAPI, and Python that answers natural-language questions about professional experience, skills, projects, and education using a Groq LLM.
- Implemented streaming LLM responses and conversation history; integrated PDF resume parsing with PyPDF and structured data validation with Pydantic.
- Deployed the React.js frontend and FastAPI backend separately on Vercel and Render.

EDUCATION

B.Tech in Software Engineering | Delhi Technological University, New Delhi

2022 - 2026

CBSE Class XII | The Union Academy Senior Secondary School, New Delhi

2019 - 2020
